

Blushing Beauty African Daisy
Osteospermum 'Balostush'

Plant Height: 10 inches
Flower Height: 14 inches
Spread: 20 inches
Spacing: 14 inches
Sunlight:
Hardiness Zone: (annual)

Description:

Full, well branched plants producing multitudes of beautiful golden yellow flowers with deep purple-pink centers; drought tolerant once established; adds a soft, romantic look to mass plantings and containers

Ornamental Features

Blushing Beauty African Daisy is bathed in stunning gold daisy flowers with deep purple centers at the ends of the stems from late spring to mid fall. The flowers are excellent for cutting. Its spiny narrow leaves remain green in colour throughout the season.

Landscape Attributes

Blushing Beauty African Daisy is an herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Blushing Beauty African Daisy is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Blushing Beauty African Daisy will grow to be about 10 inches tall at maturity extending to 14 inches tall with the flowers, with a spread of 20 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Its foliage tends to remain low and dense right to the ground. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Blushing Beauty African Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
